

DELTA SEC Drying Agent

Animal well-being improves overall results

Top ranked drying powder on the market for its high-absorbing properties.

More than 42 fl. oz. of water are absorbed per lb. of product !

Hygiene

Drying of newborn piglets:

- Enhances feeling of well-being
- Quicker healing time for umbilical cord
- Faster colostrum intake

Thanks to its **absorption capacity**, DELTA SEC lasts longer on the duckboards, gratings or pens.

Reduction of bacterial contamination.

A drier unit reduces the risk of infection.

DELTA SEC guarantees an extended soft and dry crate:

- Better control of body temperature

PHOSPHATE FREE

BIODEGRADABLE

EXPECTORANT

MAKES CLEANING EASIER

INSECT REPELLENT

REDUCES AMMONIA PRODUCTION

DELTA SEC mixed at the rate of 42 fl. oz. in 1lb. of product (result in 1 minute)

Alphatech

DELTA SEC Drying Agent

Animal well-being improves overall results

55 lbs. bag

Composition :

Ingredients from mineral origin

Ingredients from vegetal origin

Ingredients from marine origin

Yucca Schidigera extracts

Essential oils

Barns upkeep: 4 oz. per crate
Spread DELTA SEC after cleaning the facility and continue use as needed by spreading as required.

Breeding and Insemination : apply DELTA SEC on vulva to keep it dry and clean to reduce the risk of infection.

Gestation: 2 oz. per day behind the sows.

Farrowing: 4 oz.
Sprinkle DELTA SEC in pens and heat mats before farrowing.

Deltasec is tailor-made for application on all surfaces.

Birth: 2 oz. per piglet
Dipping piglets in DELTA SEC immediately after birth prevents the risk of contamination. DELTA SEC absorbs the moisture and maintains the body temperature to promote faster suckling and growth.

Other applications :

- Growing and Finishing: 1 lb. per 100 sq. ft.
- Transportation: to reduce stress and fights due to the same smell.
- Trade show: to provide enhanced well-being.
