

CHLOR FOAM POWDER

POWDER CHLORINATED ALKALINE MANUAL CLEANER

This product is a concentrated, high-foam, built, chlorinated alkaline detergent made specifically for foam-cleaning applications. This product can be used in applications where foam and high-surfactant levels are needed. CHLOR FOAM POWDER is strong enough to handle the most difficult soils and cleaning applications even when using hard water. This product is free-rinsing with normal water rinses. This product works well in all foaming/manual cleaning applications where alkalinity and chlorine are required.

Physical Properties (Typical)

Appearance	White powder
Odor	Chlorine
Loose Density	8.3 pounds/gallon
Specific Gravity	1.0
pH (1% Solution)	>12

Chlor Foam Powder is designed for use with bucket and brush applications as well as in foaming equipment including wall mounted and portable units.

Directions for Use

This product is designed for use at 0.5-2% concentration in water depending on foaming equipment, soil, and water conditions.

Dilute with warm or hot water and apply with foamer, sprayer or brush.

Chlor Foam Powder does not contain any nonylphenol ethoxylates (NPEs). It is better for the environment and is subject to fewer regulatory restrictions than similar NPE-containing products.

Chlor Foam Powder will work in hard or soft water. Minor adjustments of the air pressure can result in large changes to the foam character

Available sizes: 8 lbs., 100 lbs. & 400 lbs.
