

Questions and Answers on Degrease Powder

Question: “What is unique about Degrease Powder?”

Answer: Degrease Powder is concentrated, powder, moderate-foam degreasing alkaline detergent that is strong enough to handle the most difficult, greasy soil cleaning applications even in very hard water.

Question: “What are all of the uses for Degrease Powder?”

Answer: Degrease Powder can clean a variety of the toughest greases on any alkaline-resistant surface. Always read label before use for instructions.

Question: “What fragrance does Degrease Powder have?”

Answer: Degrease Powder has a mild odor.

Question: “Is Degrease Powder free-rinsing?”

Answer: Yes, this product is free-rinsing with normal water rinses.

Question: “Do I need to dilute Degrease Powder in water or do I just sprinkle the powder on whatever grease I need to clean?”

Answer: You can do either one depending on the soil. Degrease Powder can either be diluted using 1 – 5% product in warm (80 - 100°F, 27 - 38°C) water, or it can be sprinkled directly on oil and grease. Always read label before use for full instructions.
