

## ARMOR SHINE

### CLEANER AND PROTECTANT

This mineral oil-based product has strong cleaning action enhanced by cationic surfactants that will pull soils away from surfaces. After wiping away the soils, this product will leave a clean, ionically-charged protective layer that will last until removed. This is a concentrated, enhanced product and will work best when shaken before use. Helps to protect exterior automotive surfaces from UV damage.

Use after every wash to keep your vehicle looking like new!

#### Physical Properties (Typical)

Appearance	Opaque White Liquid
Density	8.35 pounds/gallon
Odor	Characteristic
pH (as is)	7
Specific Gravity	1.00 (Water = 1.00)

#### **Directions for Use**

1. Shake Well.
2. Apply liberally to a clean cloth and spread evenly, or spray directly onto surface.
3. Wipe off excess.
4. Apply as needed to maintain surface appearance and protection.

This product does not contain any nonylphenol ethoxylates (NPEs). It is better for the environment and is subject to fewer regulatory restrictions than similar NPE-containing products.

This product does not contain any phosphates.

Available sizes: 1 qt.
