

THE COLOR OF CLEAN

Kemphos 2001 CTSP Pink

Kemphos 2001 CTSP Pink

THE PRODUCT THAT PROVES IT CLEANED

Verify your brewery cleaning process. Kemphos 2001 CTSP Pink contains a built-in indicator that can act as a “private laboratory” for beer equipment applications. The solution’s color changes from pink to milky white when residues still exist in the system or equipment. A pink solution at the end of cleaning helps to indicate the completion of the cleaning process*.

*See brewcleaning.com for more information on this product.

Product Features and Benefits:

- Solution changes color to show when the surface is clean
- Cleans and deodorizes surfaces and equipment
