

DEGREASE POWDER

MODERATE FOAM DEGREASING ALKALINE POWDER DETERGENT

This product is a concentrated, powder, moderate-foam degreasing alkaline detergent. Degrease Powder does not contain chlorine and is designed for challenging applications where foam is acceptable or desirable. This product is strong enough to handle the most difficult, greasy soil cleaning applications even in very hard water. This product is free-rinsing with normal water rinses.

Physical Properties (Typical)

Appearance	White powder
Density	8.35 pounds/gallon
Odor	Mild
pH	> 12 (1% solution)
Specific gravity	1.00 (Water = 1.00)

Directions for Use

This product is designed to use at 1 - 5% concentration in water depending on equipment, soil and water conditions.

For removal of heavy grease, applications, use 5% in warm (80 - 100F, 27 - 38C) water and let sit for 1 - 5 minutes. Pressure wash or squeegee to remove soil and cleaning solution.

- Sprinkle product directly on oil/grease mixtures
- Let sit one minute to emulsify
- Pressure wash to remove.

Powder does not contain any nonylphenol ethoxylates (NPEs) and therefore is better for the environment and faces fewer regulatory restrictions and environmental implications than similar NPE-containing products.

Available sizes: 40 lbs. & 400 lbs.
