

BOOST BUILDER

CONCENTRATED ALKALINE BUILDER FOR USE IN LAUNDRY APPLICATIONS

BOOST BUILDER (BB) is a highly concentrated alkaline silicate builder for use in commercial laundry washing machines. BB aids detergency to improve soil and stain removal. BB neutralizes acid soils and breaks down animal fat and vegetable oils. Use BB with DeVere Boost Detergent, or DeVere EcoBoost Environmentally Safe Detergent.

Physical Properties (Typical)

| | |
|------------------|---------------------|
| Appearance | Red liquid |
| Density | 10 pounds/gallon |
| Odor | Mild to none |
| pH | > 12 |
| Specific gravity | 1.20 (Water = 1.00) |

Directions

Procedure

Presort Laundry by colors, fabric type and soil load; add BB to wash cycle.

Usage

- Light Soil: Use 2 oz. (59.1 ml) BB per 50 lbs. (22.7 kg) of fabric
- Medium Soil: Use 3 oz. (88.7 ml) BB per 50 lbs. (22.7 kg) of fabric
- Heavy Soil: Use 4 oz. (118 ml) BB per 50 lbs. (22.7 kg) of fabric

NOTE: Amount may vary due to water conditions

All significant components in Boost Builder are biodegradable. A biodegradability statement is available upon request.

Boost Builder does not contain any nonylphenol ethoxylates (NPEs) and therefore is better for the environment and faces fewer regulatory restrictions and environmental implications than similar NPE-containing products.

Boost Builder does not contain any phosphates.

Available sizes: 5 gal.
