LED DISPENSER

The LED Dispenser is a standard size, battery-operated dispenser that automatically dispenses aerosol sprays at programmed intervals. It works most effectively when mounted on the wall at least seven feet above the floor. When combined with DeVere’s deodorizing metered aerosols, this dispenser is part of a total odor control system. DeVere also has metered insecticide available in cans that fit this dispenser.

Features and Benefits

- Chemical-resistant polymer construction
- Recessed red usage-indicator light for 3,000 metered sprays
- Select the interval you want (5, 15, or 30 minutes)
- Select if you want it to work 24-hours/day or only when the lights are on
- Keyed or keyless options available
- Audible reminder when the can needs to be replaced
- One-year battery life (spraying at 15-minute intervals 24 hours/day, 365 days/year).
- Use with all DeVere metered aerosol cans

Easy Installation

1. Open dispenser by inserting Key and pull cover forward. Dispenser cover is hinged at bottom.
2. Insert two fresh D-Cell alkaline batteries (if not already inserted) into the designated slots at the top of the unit.
3. Make sure the dispenser is off (no lights on panel).
4. Clean section of wall where dispenser will be mounted.
5. Remove paper backing from tape strips (if mounting by included double-stick tape squares)
6. If mounting with screws, remove battery unit, position screws over wall stud, drill starting holes, place dispenser over holes and screw into place with the included screws.
7. Replace battery unit (if needed).
8. Place a metered aerosol can into the dispenser. Make sure the tip is facing forward and the shoulder of the can is resting in the metal retaining bracket.
9. Press the On/Off button to activate the unit. The LED indicator will flash green/red 3 times and the arm will activate once as a system check.
   - TO AVOID BEING SPRAYED WHEN THE UNIT ACTIVATES, DO NOT STAND IN FRONT OF THE DISPENSER
10. Select spray interval by pressing the MODE button. Choose either 5, 15, 30-minute interval setting.
   - A RED or GREEN LED interval indicator will remain on for 10 seconds to indicate the selected interval.
11. Select 24hrs or AUTO (only works when room lights are on) operation by pressing the MODE button.
   - If the LED interval indicators display RED the unit will operate 24 hours a day. If the LED interval indicators display GREEN the unit will operate only in the presence of light.
   - To recall spray interval, press MODE button once, the LED indicator will light for 10 seconds.
12. Close the cover and allow to operate.

**Normal Operation**
1. Green LED blinks approximately every 5 seconds.
2. Red LED blinks indicate it is time to replace the aerosol can.
3. No blinking light indicates the need to replace batteries.

**Tips and Tricks**
- Clean as needed with detergent (e.g. DeVere Restroom Cleaner and Deodorizer).
- If dispenser arm actuates and can does not spray:
  - Check to make sure can is full.
  - Press can to back of metal retaining bracket.
  - Note: You can place a spacer in front of can if can slides forward when dispenser arm comes down.

**Use this dispenser with all DeVere metered aerosols**
